

I have enjoyed satellite radio for nearly two years. It is wonderful to have while traveling. I am no longer distracted with having to change stations looking for a signal and a local station to listen too while driving. I am kept up to date with the news, and am able to listen to the kind of music I like all around the country.

I have been traveling many times and encountered bad weather. Unable to find a local station with an update, I did not know how bad the storm would be, how long it would last or where it was headed. Many times I have wished my satellite company could provide me with the weather where I was. Please reject the NAB's petition 04-160. I should be able to pay for the services I want and not blocked by local stations who don't like competition. If the NAB had their way in the past, we would not have televisions in our homes, or FM radio. Imagine that, and imagine the advantages of Satelitte Radio. Don't allow them to dictate our options.
